SINCE 1977

ASTROLAB

MULTI BOILER

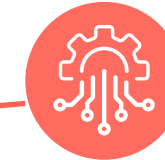

Multi Boiler

Independent boilers for steam and each group. PID-controlled in 3 different points: steam boiler, coffee boiler and group heads

NEW: PHS

Pre-heating system: water is pre-heated through the steam boiler before reaching the coffee boiler, ensuring thermal stability and increased performance

Digital Management

Easy control and real-time monitoring of portions, temperatures, counters and timings via the OLED display

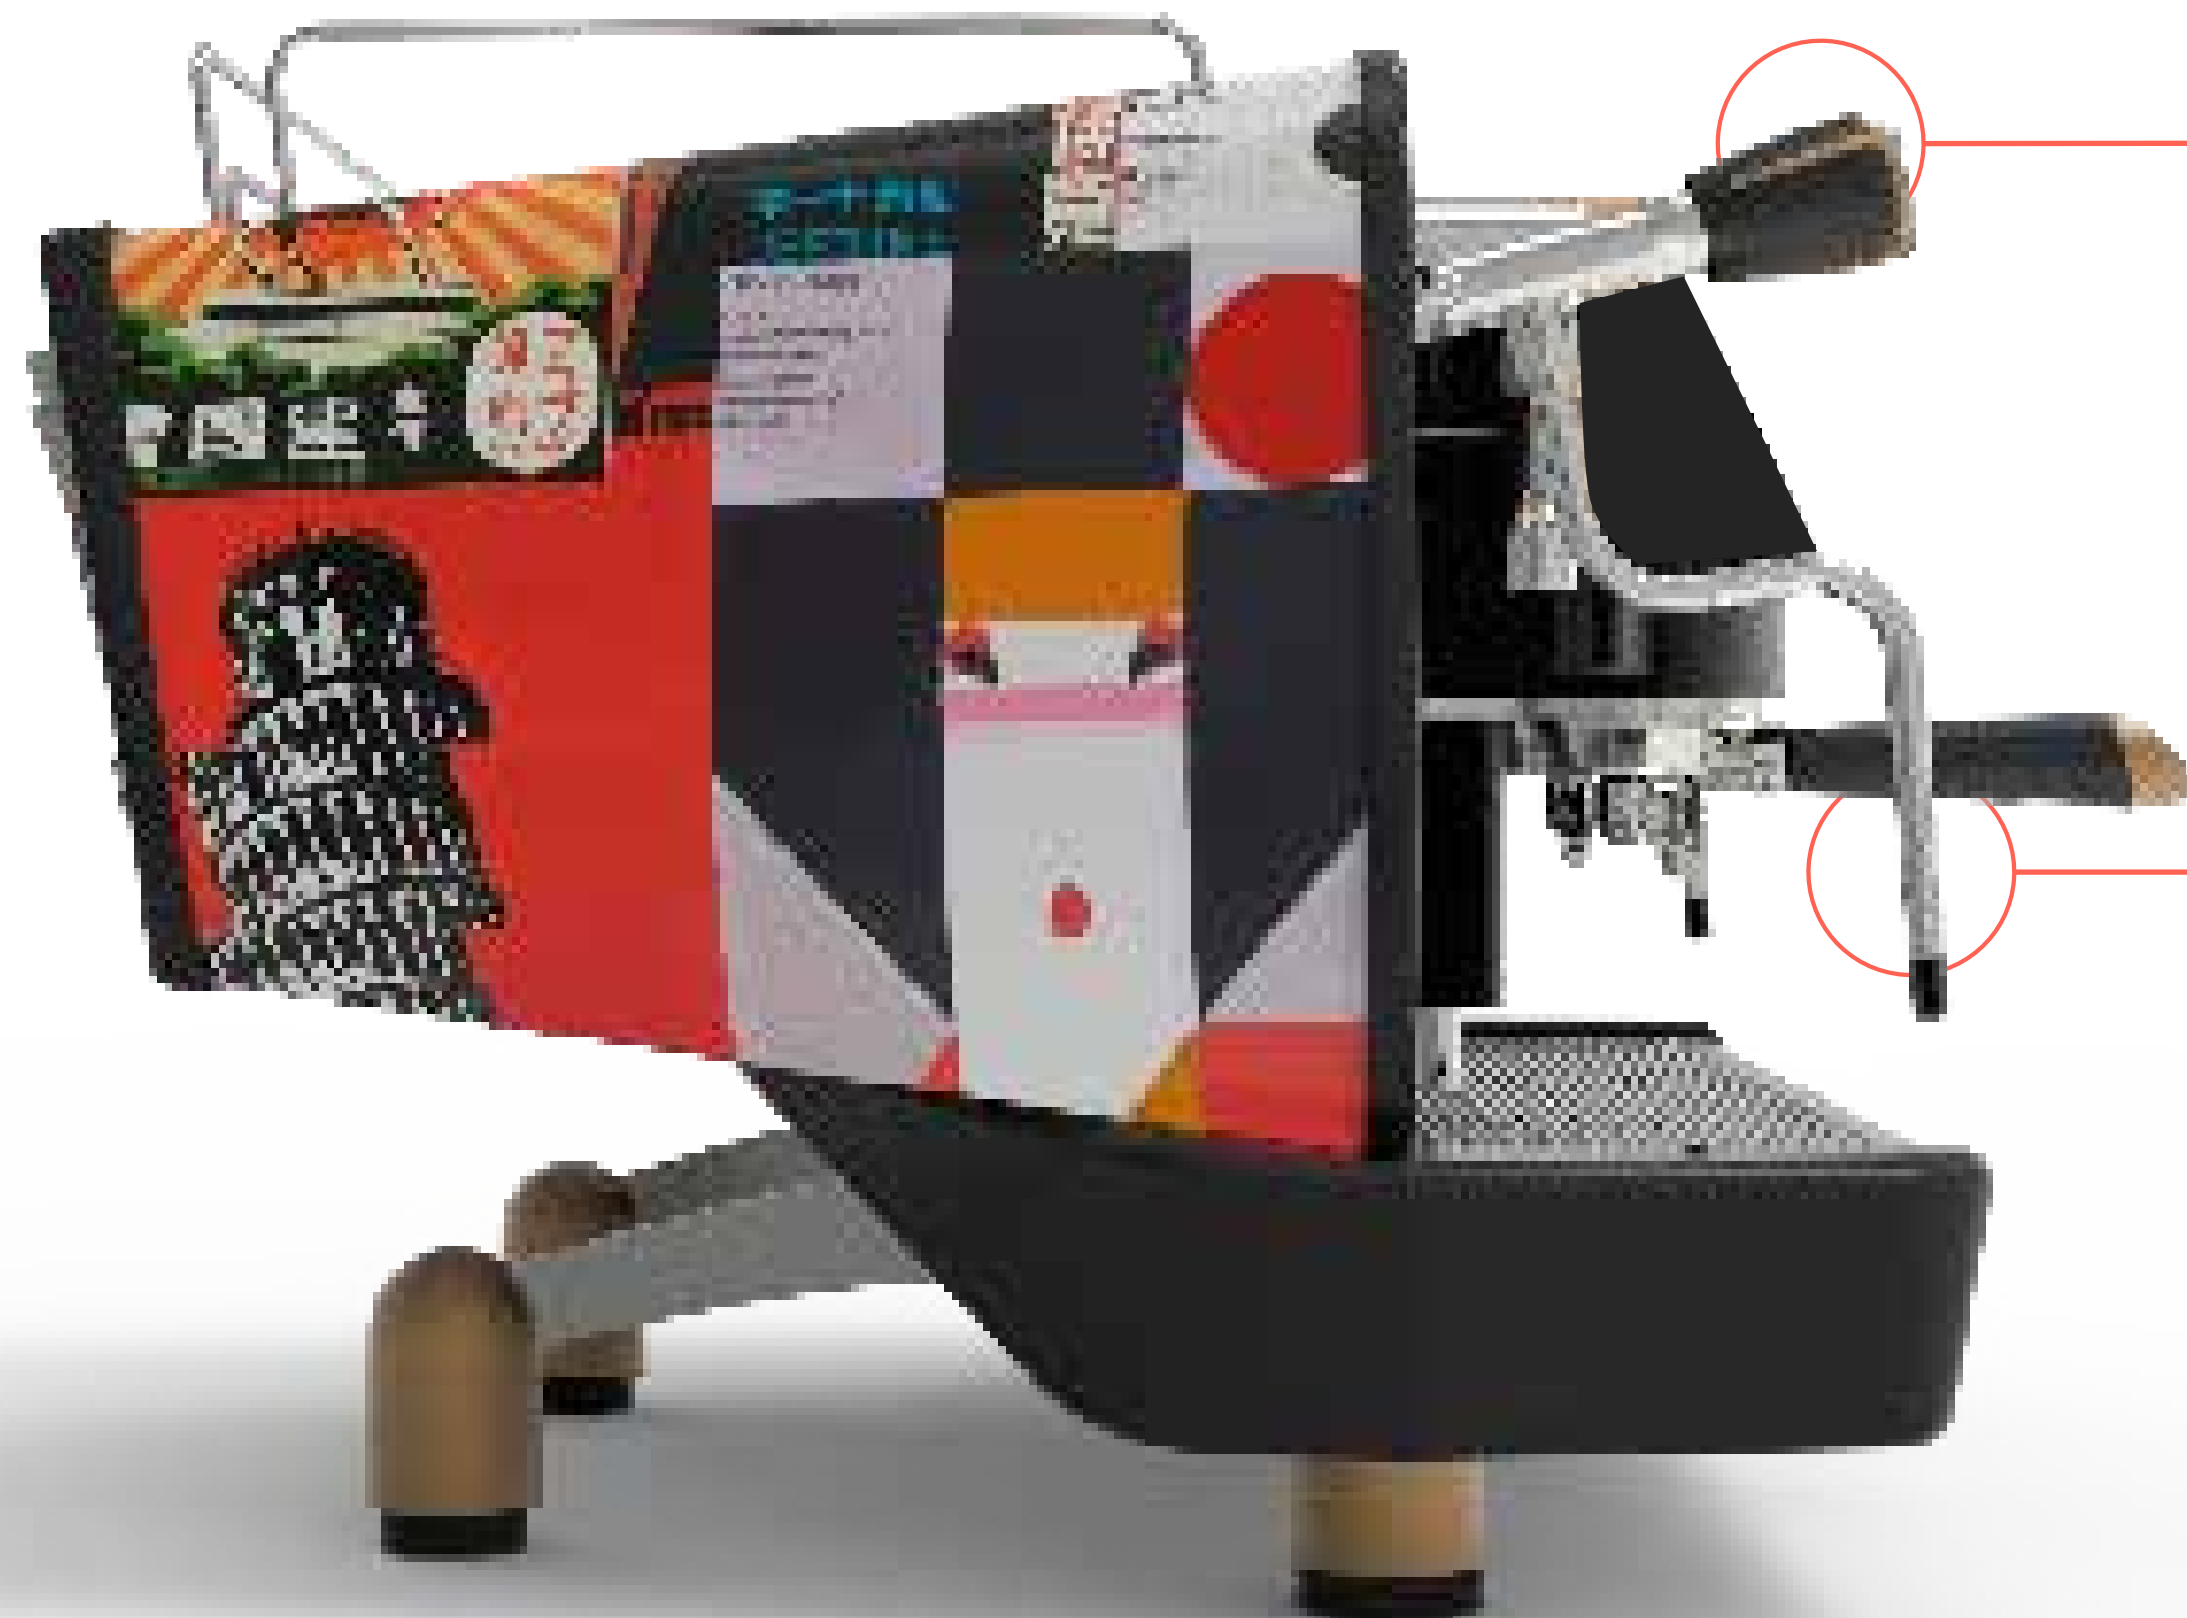

Instant Flush

Activate the group flush with one touch on the shortcut button
